

# 5G ACCELERATES INDOOR DIGITALIZATION

INDOOR 5G ROUNDTABLE 2023

MWC DAY 2, FEB.28 16:30-18:00(GMT+1)

ARENAS 2 – 3, PORTA FIRA HOTEL

## INVITATION

Dear Ms./Mr. \_\_\_\_\_,

We would be delighted to welcome you to our “Indoor 5G Roundtable 2023” in Barcelona on February 28, 2023.

This forum is organized by IDATE to gather representatives from the whole industry, who will share and discuss the latest practices and trends.

Global 5G network development has entered an accelerated period. Indoor traffic density is 10 times that of outdoors. Consistency of indoor and outdoor experience is becoming more and more important. Experience-based network construction is the driving force for indoor network development in the 5G era.

At this year's forum, IDATE will gather with EU representatives, industry partners, and leading global operators to discuss the opportunities and challenges facing the 5G indoor industry on the theme “5G accelerates indoor digitalization”.

We look forward to seeing you there.

**Jean-Philippe Carchano**  
IDATE CHAIRMAN & CEO
