

GREEN ALL-OPTICAL CONNECTIONS UNLEASHING GIGA EXPERIENCE

GREEN ALL-OPTICAL NETWORK FORUM 2023

I N V I T A T I O N

MWC Day 1, Feb.27 15:30–17:30(GMT+1)

Hotel Porta Fira

Dear Ms./Mr. _____,

We would be delighted to welcome you to our “Green All-Optical Network Forum 2023” in Barcelona on February 27, 2023.

This forum is organized by IDATE to gather world-class players from the optical network industry, who will share and discuss the latest practices and trends.

The first Green All-Optical Network Forum was held in 2022.

Participants discussed how all-optical connections could enable green low-carbon networks. With the impact of the pandemic accelerating global digitalization, households and businesses have raised higher requirements for network connectivity. This growth makes eco-responsible development more necessary than ever. Hence, all-optical networks are the cornerstone of fixed broadband network construction to provide a sustainable Gigabit experience.

At this year's forum, IDATE will gather with EU representatives, industry partners, and leading global operators to discuss the opportunities and challenges facing the optical network industry on the theme “Green All-optical Connections Unleashing Giga Experience”.

We look forward to seeing you there.

Jean-Philippe Carchano
IDATE CHAIRMAN & CEO
